Summary

I am a passionate and self-driven student pursuing a bachelor's degree in computer science at Grets University, with a primary focus on data analytics using MS Excel and Python. Through my coursework and hands-on projects, I have developed a strong foundation in data analysis techniques, data manipulation, and programming.

Skills

Data Analysis Skills, Microsoft Excel, SQL, Project management skills, Organizational skills, and problem solving with Python

Experience

By working on personal projects, I have gained hands-on experience and applied my skills in data analytics, demonstrating my ability to work independently and deliver results. These projects highlight my proficiency in tools like Python, Pandas, HTML, and CSS and provide concrete examples of my problem-solving abilities, data manipulation skills, and presentation of findings.

Although I haven't had professional experience yet, my personal projects showcase my dedication, passion, and commitment to honing my data analytics skills. They serve as evidence of my ability to handle real-world datasets, derive meaningful insights, and effectively communicate the results.

Education

Grets University | Thika, Thika
Bs Computer Science | 12/2024
Specialization: Data Analytics

Relevant Coursework:

- Introduction to Computer Science
- Data Structures and Algorithms
- Database Management Systems
- Statistical Analysis and Modeling
- Data Visualization and Presentation
- Programming in Python
- Web Development
- Machine Learning

Projects and Assignments:

Developed a data analysis project using MS Excel and Python to analyze and visualize datasets, gaining hands-on experience in data manipulation and insight extraction.

Utilized statistical analysis techniques and programming skills to develop a machine learning model for a predictive analytics project.
